Introduction

1.1 Protocol #1

1.2 Inverse Finance

Inverse Finance's Risk Working Group (RWG) is to brief the Growth Working Group (GWG) on which, if any, risks the DAO will assume by fulfilling the proposal at hand. They may also raise awareness of the findings of the assessment to the partner protocols, in an effort to find a solution that satisfies all parties.

1.3 Methodology

To perform this risk assessment, the RWG will make use of the [OWASP Risk Methodology](#) to standardize the evaluation of risk for the studied collateral assets. As a reminder,

- Likelihood represents how likely a particular vulnerability is to be uncovered and exploited in the wild;
- Impact measures the technical loss and business damage of a successful attack;
- Severity demonstrates the overall criticality of the risk.

Likelihood and impact are categorized into three ratings: H, M and L, i.e., high, medium and low respectively. Severity is determined by likelihood and impact and can be classified into four categories accordingly, i.e., Critical, High, Medium, Low, and Note, shown in the accompanying figure.

To evaluate the risk, we go through a list of check items and each would be labeled with a severity category. For one check item, if our tool or analysis does not identify any issue, the risk is considered addressed appropriately. For any discovered issue, we recommend the GWG request the protocol/s involved for additional information and, depending on the severity, that a solution be found.

----- Impact ----->	High	Medium	High	Critical
	Medium	Low	Medium	High
	Low	Note	Low	Medium
		Low	Medium	High
		----- Likelihood ----->		

Findings

2.1 Protocol #1

The risks are categorized in the following buckets: Governance, Market, Operational, Oracle, and Technological risks.

Governance Risks -

Description	Likelihood	Impact	Severity

Market Risks -

Description	Likelihood	Impact	Severity

Operational Risks -

Description	Likelihood	Impact	Severity

Oracle Risks -

Description	Likelihood	Impact	Severity

Technological Risks -

Description	Likelihood	Impact	Severity

Results

Below is a summary of our findings per our risk assessment. For the purpose of this document, anything with “Severity” Medium or above will be discussed.

3.1 Protocol #1

Severity		# of Findings
Critical		
High		
Medium		
Low		
Note
